

IMIDAZOLE DERIVATIVES FOR TREATMENT OF ALLERGIC AND HYPERPROLIFERATIVE DISORDERS

Abstract of the Disclosure

The preferred embodiments are directed to small molecule inhibitors of the IgE response to allergens, which are useful in the treatment of allergy and/or asthma or any diseases where IgE is pathogenic. The preferred embodiments also relate to imidazole molecules that are cellular proliferation inhibitors and thus are useful as anticancer agents. The preferred embodiments further relate to small molecules which suppress cytokines and leukocytes.
